PROFESSIONAL SUMMARY

I'm a Frontend Developer who builds **responsive, high-performance web applications** using **React.js, Next.js, TypeScript, and Tailwind CSS**. I focus on writing **clean, reusable code** and designing intuitive user interfaces that deliver seamless experiences. My work spans **authentication systems, management platforms, and job portals**, giving me a strong mix of technical problem-solving and UI/UX expertise. I thrive in **Agile/Scrum teams**, where I contribute to sprint planning, collaborate across functions, and deliver features quickly and with precision.

WORK EXPERIENCE

Associate Software Engineer, *Invobyte*   05/2025 – Present
CIMS: Authentication & Authorization Server for Secure Resource Access   Lahore, Pakistan
- Developed front-end features with **Next.js, shadcn/UI, and Tailwind CSS**, creating optimized, reusable components for managing client- and application-level access control based on **ABAC and RBAC models**.
- Manually integrated **OpenID Connect (OIDC)** on the frontend, ensuring secure authentication and seamless user access management.
- Participated in **sprint planning**, providing accurate task estimations and prioritizing deliverables to meet project deadlines.

Junior Frontend Developer, *Tekvaly, Phenologix* ⧉   06/2024 – 05/2025
ScrumDroid: Comprehensive organizational management platform for attendance, assets, and daily tasks.   (Hybrid), Canada
- Designed and optimized UIs with **React.js and SWR**, ensuring seamless data handling and responsiveness.
- Resolved **critical rendering issues** and revamped the UI to deliver a more polished and user-friendly experience.
- Implemented **performance optimization practices** and React/Next.js enhancements, boosting interactivity and overall efficiency.

TECHNICAL SKILLS

- React.js Development
- Redux, Redux Toolkit
- React Bootstrap
- HTML5, CSS3
- Adaptive/Responsive Web Design
- Version Control (Git, Github, Azure)
- MongoDB

- Next.js Development
- SWR (stale-while-revalidate) Optimization
- Material UI, ShadCN UI
- JavaScript (ES6+), TypeScript
- Cross-Platform Development
- Problem Solving
- Mongoose, Express JS

- Strapi: Development, Headless CMS
- React Query (Tan Stack Query)
- Tailwind CSS
- Performance Optimization
- API design & integration, RESTful APIs
- Supabase (Real-time Database Design)
- OIDC (Oauth flow)

Interests

- Mern Stack (Backend)
- API-Development
- Strapi (Headless CMS)
